FULL-STACK DEVELOPER | FREELANCE / CONTRACT

TypeScript | React | Next.js | Node.js | Fastify | PostgreSQL

Full-stack developer with paid freelance and contract experience delivering client web applications. Built production features across React and Next.js frontends, Fastify APIs, PostgreSQL databases, authentication, payments, third-party integrations, testing and deployment.

COMMERCIAL EXPERIENCE

FULL-STACK DEVELOPER | FREELANCE / CONTRACT

Come By Shop

LIVE CODE

PAID CLIENT PROJECT

Built and delivered a full-stack e-commerce application, working across the frontend, Fastify API and PostgreSQL database. Implemented email verification, Google OAuth, 2FA, WayForPay payments, Cloudinary uploads, validation, rate limiting, security headers and Vitest tests.

React Next.js Fastify PostgreSQL Drizzle ORM JWT / OAuth WayForPay Cloudinary Vitest

Okrip World

LIVE CODE

PAID CLIENT PROJECT

Rebuilt a Minecraft community platform with Discord login, player applications, Telegram moderation and automatic whitelist updates through a Java Paper plugin. Shared Zod schemas between the Next.js frontend and Fastify backend, used PostgreSQL with Drizzle, and added Vitest coverage for login and the main application flow.

Next.js Fastify PostgreSQL Drizzle ORM Zod Discord OAuth Java Vitest

SELECTED PROJECT

Nami Gear

LIVE CODE

PERSONAL PROJECT

Built a compact e-commerce application with a product catalog, persistent cart and checkout. Product and stock data use Neon PostgreSQL; TanStack Query handles data fetching, Zustand stores the cart, Cloudinary hosts images, and Next.js Route Handlers store basic order data.

Next.js 16 TypeScript Neon PostgreSQL Zustand TanStack Query Cloudinary

TECHNICAL SKILLS

LANGUAGES

TypeScript JavaScript SQL HTML CSS

FRONTEND

React 19 Next.js Tailwind CSS Zustand TanStack Query

BACKEND & DATA

Node.js Fastify REST APIs PostgreSQL Drizzle ORM Zod

AUTH & INTEGRATIONS

JWT NextAuth Google OAuth Discord OAuth Cloudinary Resend WayForPay

QUALITY & DELIVERY

Vitest ESLint Git Docker Vercel Railway

EDUCATION

Self-directed software development

2024 - present

MDN, React and TypeScript documentation; practical project work.
